Summary

I'm professional Front-End Developer with 11 years of extensive experience.

I have commercial development experience using Angular, AngularJS, React, Vue3, Ionic, React Native. Proficient in JavaScript, TypeScript, HTML5, CSS3, SASS, and LESS. I have a deep understanding of web development tools and practices.

Having worked in Agile teams, I bring a collaborative and adaptive approach to my work. I'm quick to identify and resolve bugs, both in Javascript and Typescript, and has pixel-perfect accuracy when defining and implementing front-end experiences.

My goal is to provide clean usable interfaces and develop the most flexible and efficient application.

Work experience

Lead Front End Developer

October 2018 - October 2023

Similie

- I took on a leading role within the company and demonstrated a meticulous, action-oriented approach.
- Achieved a complete Parabl front-end redesign, tackling legacy code.
- Implemented BEM methodology for organized UI components.
- Introduced dynamic theming for personalized user experiences (light and dark modes).
- Performed code reviews and code quality of styles system.

Front End Developer

January 2019 - October 2019

Codersclan

- I was responsible for implementing WordPress templates that not only met the aesthetic requirements of clients but were also highly responsive.
- Created a custom Eurovision 2019 sponsor Wordpress template.
- I also had the privilege of developing a mobile application for a game using Cordova.
